Product Data

Polypropylene Screw Cap black, 8-425 thread.

- Ready to use combination seals, no time consuming and “tricky” assembly
- Available with black or white screw caps with 8-425 thread
- Available as closed top screw seals or with centre hole
- Now available either with Natural Rubber or RedRubber as cost-effective seals

Natural Rubber/TEF and RedRubber/PTFE Seals

- Natural rubber temperature resistant from - 40 °C to 120 °C
- RedRubber/PTFE from - 40 °C bis 160 °C
- Natural rubber is more difficult to penetrate than RedRubber and has a higher particle formation
- RedRubber and butyl show less fragmentation than natural rubber
- Natural rubber is ideal for multiple injections due to its good resealing properties, but not as clean as RedRubber or Butyl

Silicone/PTFE Seals

- Temperature resistant from - 60 °C to 200 °C
- Preferably for single injections only
- Different hardnesses to suit the respective needle types
- Cleaner than natural rubber, RedRubber or butyl
- Silicone septa coated on both sides for low particle formation during penetration

Natural Rubber/TEF, RedRubber/PTFE, Butyl/PTFE and Silicone/PTFE Seals, closed top

Item No.	cap	Septa	Hardness	Thickness	Price
8.0801.58	5,5 mm centre hole	Silicone white/PTFE red	45° shore A	1,3 mm	CHF 268.65
