Company Profile

Performance

Founded in 1987, Biowest is the European leader in the collection of animal sera, offering the widest range of sera and media for cell culture available on the market. Our products are in use throughout the academic, industrial and government research

sectors, in fields spanning cell biology, genomics, proteomics, virology, immunology, drug discovery and toxicology.

Our people around the world work with a strong commitment to quality, reproducibility, traceability and service.

Combined with our competitive prices and our complete range of origins, these are the reasons for our success.

The quality of our processes and products is internationally recognized, which allows us to accede to the most selective markets such as China and Japan.

... and more

Vertical integration and complete security

Biowest controls the production of the sera throughout the entire process, from the collections around the world, to the final shipment of bottled serum from our warehouse, thus guaranteeing a vertically integrated system of production and documentation.

Using specialized equipment and detailed SOP audits, Biowest ensures the quality at every stage, thereby securing a consistently high quality with low intra-lot variation.

Worldwide sources of sera and widest range of products

Biowest is the ideal partner for both researchers and biopharmaceutical companies. We offer a wide range of geographical origins of bovine sera.

It is important to choose the right serum origin. The choice of origin can be important and may depend on local regulations.

Biowest is your guarantee of the best choice of serum origin and specifications, adjusted to your needs.

Quality system

Biowest guarantees the best quality : We are ISO 9001 and ISO 13485 certified. Biowest is registered by the French Ministry of Agriculture (regulation (EC) n° 1069 / 2009) under the agreement n° FR 49.231.001 for the production of animal sera.

According to the European Regulation EC n° 999/2001, european animals are tested for BSE before the corresponding blood is allowed to be processed.

The EU is a pioneer in BSE testing and individual identification of animals through ear tagging, which ensures the best possible traceability and the lowest BSE risk and makes the EU origin the first choice for researchers in Japan and other selective markets.

Working on your request

With our outstanding knowledge in cell culture products, biowest has the special know-how to support special customer needs. According to the specific aspects of your research, our R&D laboratory can customize our formulations. We can define together every aspect of your custom made product from the beginning to the end.

WHY BIOWEST ?

- ✓ Quality and Service
- ✓ Auditability and Traceability
- ✓ Dedication and Commitment
- ✓ Compliance and Transparency

About serum

Traceable to the Source

When scientists select their sera, an important factor taken into consideration is the source. Therefore, traceability of the serum is of paramount importance.

Biowest Fetal Bovine Serum is derived from clotted whole blood, aseptically collected from bovine foetuses via cardiac puncture. Each manufactured batch is rigorously controlled, from the collection of the serum and throughout all stages of its treatment and production, through to final packaging on our premises. The product is analyzed, classified, and tested by Biowest before shipped to customers all over the world.

Our Quality System can trace raw materials back to the original supplier and slaughterhouse where they were collected. Biowest's system of vertical integration provides certainty of origin and traceability of all Sera.

Biowest Quality

FBS "quality" is defined in relation to growth promotion characteristics of a specific cell line when cultured in our sera. A batch of FBS which works well for one cell line may not work well for another cell line. Biowest customers can purchase FBS after performance-testing of a sample. There are thousands of different cell lines and no two batches of FBS are identical ; we therefore offer a Sample and Reserve policy. Each batch is delivered with a Certificate of Analysis.

Serum - Batch Reservations

Biowest is pleased to provide free samples of different batches combined with batch reservations during the test period, for up to 4 to 6 weeks. The general sample size for FBS is 50 ml / batch.

After batch testing, the reservation must be confirmed with a first order.

For customers who do not have ample storage facilities, we can store the reserved batch up to 12 months, combined with scheduled shipments.

Technical Support

Biowest's experienced Technical Service Staff is available to answer questions regarding our quality control and all Biowest products.

> We aim to provide timely, courteous and professional service.

Worldwide Sourcing

Biowest offers a wide range of sources from countries with excellent veterinary status. This includes sources from South America, as well as European Union (EU) and United States Department of Agriculture (USDA) approved sources. The choice of the FBS source is determined by import requirements and available supply for the different markets.

Biowest is the ideal partner for academic researchers and biopharmaceutical companies who select FBS based on origin and performance.

European Directorate for the Quality of Medicines

EDQM certified FBS is your guarantee that the origin and the manufacturing process of the product have been certified by the European Directorate for the Quality of Medicines & HealthCare. The EDQM protects and promotes public and animal health in Europe. Its mission is to contribute to the basic

human right of access to good quality medicines and healthcare, and to promote and protect human and animal health, by establishing and providing official standards for the manufacture and quality control of medicines valid in all the signatory states of the Convention for the Elaboration of a European Pharmacopoeia.

Biowest can provide sterile filtration and packaging of serum in its own facility that meets the criteria described in the current version of the product monograph, without the risk of transmitting agents of animal spongiform encephalopathies, n° 1483 of the European Pharmacopoeia. This is certified by the EDQM.

The countries of origin of EDQM certified FBS are Panama, Costa Rica, Uruguay, Paraguay, Brazil, Chile, Mexico, France, Columbia, USA. We are also EDQM certified calf serum from France.

Filtration and Packaging

Raw pooled serum is filtered, through a triple series of 0.1 micron, sterilizing filters for FBS for example. The sterile serum is true-pooled to ensure homogeneity.

Biowest products are packaged via an aseptic filling process for which each step has been carried out to ensure the production of a product meeting the industry sterility standard assurance level of 10^{-4} (i.e., product that demonstrates a bacterial and fungal contamination level of no more than 1 of 10,000 units during the manufacturing process). The highest level of sterility assurance ($\geq 10^{-6}$) cannot be achieved without terminal sterilization. Filtration and dispensing are performed within positive pressure, HEPA-filtered, environmentally controlled rooms.

> **FBS Final Filter Size : Triple 0.1 micron**

Sterility

All sera are tested for the absence of aerobic and anaerobic bacteria, fungi and yeast.

The sterility test procedure is based on the European Pharmacopoeia or US Pharmacopoeia depending on the location of final filtration.

Products are dispensed via an aseptic process to ensure that all Biowest products achieve the highest Sterility Assurance Level. A representative number of samples from each production batch is selected for Sterility testing.

Mycoplasma

Each final product batch is tested for the absence of mycoplasma. The sera are tested for the absence of Mycoplasma utilizing a cell culture assay in Axcell Biotechnologies media by culture method. Our test is accurate within the limits of the detection method used.

Virus Testing

Each batch of serum is tested for adventitious viruses using cell culture techniques.

The serum is tested for:

- Bovine Viral Diarrhoea (BVD)
- Infectious Bovine Rhinotracheitis (IBR)
- Parainfluenza Type 3 (PI3)

Sera are tested for the absence of the indicated viruses by inoculation with GBK cells. The detection of virus is made by indirect immunofluorescence.

Antibody Testing : presence of specific antibodies is detected utilizing an ELISA Assay. The serum from equidea is tested for the presence of Equine Infectious Anemia antibodies.

Cell Culture Testing

Each batch of serum is tested for its ability to support in vitro growth of specific cell lines. Therefore, in addition to verifying that each batch of sera passes our exacting quality control specifications, three important performance criteria are evaluated in our Quality Control Program :

- Growth Promotion
- Cloning Efficiency
- Plating Efficiency

Biological performance is assessed using cell culture medium supplemented with a final concentration of 10% serum. During the test period, cultures are examined microscopically for any morphological abnormalities that may indicate toxic components in the serum.

The following cell lines are utilized to determine growth promotion and functionality :

Cell Line	Type	Species
HELA	Cancer	Human
L929	Fibroblast, Macrophage	Mouse
SP2/0-AG14	Lymphoma	Mouse
MRC-5	Lung	Human

Haemoglobin

A quantitative and colorimetric assay is performed to determine the residual haemoglobin concentration in each product batch.

Endotoxin Test (LAL)

All sera are tested to determine and quantify endotoxin levels. Biowest conducts a chromokinetic (quantitative test) method D of the European Pharmacopoeia.

Total Protein

Protein detection	Methodology
Protein	Biuret Colorimetry
Albumin	Immunoturbidimetry
Globulin	Immunoturbidimetry

Osmolality

Osmolality is determined by a lowered freezing temperature. The osmometer is calibrated using traceable standards.

pH

All pH meters are calibrated daily with standard solutions.

Bovine Spongiform Encephalopathy (BSE) Testing

According to the European Regulation EC n° 999/2001, animals are tested for BSE before the corresponding blood is allowed to be processed. The EU is pioneer in BSE testing and individual identification of animals through ear tagging, which ensures the best possible traceability and the lowest BSE risk and makes the EU origin the first choice of researchers in Japan and other selective markets.

Urea	Urease UV
Creatinine	Colorimetric Kinetic (Jaffé)
Triglycerides	Glycerokinase Trinder Colorimetry
Iron	TPTZ Colorimetry

Storage

All Biowest products have labels indicating storage conditions, batch number, and expiry date.

Optimal product performance is guaranteed, when the product is stored properly. Animal Sera and Plasma are stored at -20°C.

Expiration Date

The shelf life for animal Serum is 60 months, and for animal plasma 48 months.

Intended Use

These products are intended for research applications. It is the end user's responsibility to qualify these products for their specific application.

These products are not for diagnostic use. The safety and efficacy of these products in diagnostic or other clinical uses have not been established.

HIGHEST QUALITY FETAL BOVINE SERUM - FBS

FBS PREMIUM

By using FBS Premium, our customers save time in their daily work: they avoid time consuming batch testing. FBS Premium is a collection of high quality batches, selected on excellent and defined values for essential data:

- Endotoxin level < 5 EU/ml
- Hemoglobin level < 25 mg/100 ml
- Growth promotion > 80% guaranteed **

By respecting those criteria, we ensure you a low batch-to-batch variation.

Avoid losing time in batch testing, use FBS Premium.

FBS South America, Premium

Cat N° :	S181B-100 S181B-500	Unit/Size :	100 ml 500 ml		 -20°C	 40m
----------	--------------------------------------	-------------	--------------------------------	---	---	---

* see page 10

** on 4 Cell lines : SP2/O-Ag14, HELA, L929 and MRC-5

FBS ULTRA LOW

FBS Ultra has a guaranteed endotoxin level of < 0.1 EU/mL and is appropriate to be used for most sensitive cell cultures or other applications that could be disturbed by high endotoxin levels. It has the same high quality standards like our other sera and is triple 0.1µm Filtered and tested for Virus & Mycoplasma.

FBS South America, Ultra-low Endotoxin

Cat N° :	S1860-100 S1860-500	Unit/Size :	100 ml 500 ml		 -20°C	 40m
----------	--------------------------------------	-------------	--------------------------------	---	---	---

- Other packaging available on request.

SPECIALITY FETAL BOVINE SERUM

Heat Inactivation (56°C-30 mn)

This treatment destroys 'complement' and thus avoids interference with some experimentation, in particular immunology tests. It also inactivates viruses and destroys some bacterial contaminants such as the mycoplasma.

FBS South America, Heat inactivated

Cat N° :	S181H-100 S181H-500	Unit/Size :	100 ml 500 ml		 -20°C	 60m
----------	--------------------------------------	-------------	--------------------------------	---	---	---

- **To order this treatment for any other serum using code H**
please replace the last number of its Cat N° by the letter H

Gamma Irradiation

Gamma irradiated serum minimizes the risk associated with the use of animal products and offers protection against low levels of microbial contaminants. The treatment inactivates viruses of potential concern, such as foot and mouth disease, vesicular stomatitis, rinderpest, peste des petits ruminants, Rift valley fever, bluetongue... while maintaining growth promotion potential. The serum is gamma irradiated on a regular basis at 25 kGy and other doses are available upon request.

FBS South America, Gamma Irradiated

Cat N° :	S181G-100 S181G-500	Unit/Size :	100 ml 500 ml		 -20°C	 60m
----------	--------------------------------------	-------------	--------------------------------	--	--	--

- **To order this treatment for any other serum using code G**
Please replace the last number of its Cat N° by the letter G

Charcoal stripping :

Biowest offers Charcoal / Dextran stripped Fetal Bovine serum for researchers requiring low levels of hormones. Charcoal / Dextran stripping reduces the concentration of steroid hormones in Serum such as estradiol, progesterone, cortisol, testosterone, T3 and T4. This Serum is usefull where the endogenous molecules may interfere with experimental research. This serum may show some reduced growth promotion ability for cells requiring the presence of certain hormones (Biblio: Northbio).

FBS South America, Charcoal stripped

Cat N° :	S181F-100 S181F-500	Unit/Size :	100 ml 500 ml		 -20°C	 60m
----------	--------------------------------------	-------------	--------------------------------	---	---	---

- **To order this treatment for any other serum using code F**
please replace the last number of its Cat N° by the letter F

Dialysation :

The dialysis reduces the concentration of free low molecular weight components such as nucleotides, amino acids, hormones and ions. We use a dynamic filtration method to produce our dialysed serum. The sera are dialysed using a 10 000 molecular weight cut-off membrane.

FBS South America, Dialysed

Cat N° :	S181D-100 S181D-500	Unit/Size :	100 ml 500 ml
----------	--------------------------------------	-------------	--------------------------------

- **To order this treatment for any other serum using code D** please replace the last number of its Cat N° by the letter D

Lipid depletion :

Biowest uses the fumed silica precipitation method for removing lipids. The fumed silica powder is added to the serum. It's well mixed together, after which the solution is centrifuged. The supernatant contains the serum and the lipids are with the silica in the pellet.

FBS South America, Lipid Depleted

Cat N° :	S181L-100 S181L-500	Unit/Size :	100 ml 500 ml
----------	--------------------------------------	-------------	--------------------------------

- **To order this treatment for any other serum using code L** please replace the last number of its Cat N° by the letter L

Iron supplementation :

A 1% Ferric citrate sterile solution is added to the serum at 0,246% (v/v). Then the serum is well mixed. Transferrin is normally 20 to 40 % bound to iron.

FBS South America, Iron Supplemented

Cat N° :	S181R-100 S181R-500	Unit/Size :	100 ml 500 ml
----------	--------------------------------------	-------------	--------------------------------

- **To order this treatment for any other serum using code R** please replace the last number of its Cat N° by the letter R

Exosome depletion

Exosome depleted serum is treated with our proprietary ultrafiltration method. This treatment depletes the microvesicles naturally present in the serum. Biowest guarantees at least $\geq 95\%$ depletion of exosome.

FBS South America, Exosome Depleted

Cat N° :	S181M-100 S181M-500	Unit/Size :	100 ml 500 ml		 -20°C	 60m
----------	------------------------	-------------	------------------	---	---	---

● **To order this treatment for any other serum using code M**
please replace the last number of its Cat N° by the letter M

Tetracycline Free

The serum is tested for the presence of Chlorotetracycline, Oxytetracycline and Tetracycline by a liquid chromatography electrospray ionisation tandem mass spectrometry method. The detection limit is < 0.05 mg/l

FBS South America, Tetracycline Free

Cat N° :	S181T-100 S181T-500	Unit/Size :	100 ml 500 ml		 -20°C	 60m
----------	------------------------	-------------	------------------	---	---	---

● **To order this treatment for any other serum using code T**
please replace the last number of its Cat N° by the letter T

Embryonic Stem Cells

The serum is tested to confirm a high growth factor content. The cell growth is studied during two passages with mouse embryonic stem cell E14 cell line. The validation criteria are the cell growth and the perfect morphology of the cells.

FBS South America, Embryonic Stem Cells tested

Cat N° :	S181S-100 S181S-500	Unit/Size :	100 ml 500 ml		 -20°C	 60m
----------	------------------------	-------------	------------------	---	---	---

● **To order this treatment for any other serum using code S**
please replace the last number of its Cat N° by the letter S

BOVINE SERUM ALBUMIN - BSA

Bovine serum albumin (BSA) is commonly used in cell culture protocols, particularly where protein supplementation is necessary and the other components of serum are unwanted. In cell culture, its main role is as a carrier of small molecules. Because of its negative charge, BSA binds water, salts, fatty acids, vitamins and hormones, then carries these bound components between tissues and cells. The binding capacity also makes BSA an effective scavenger to remove toxic substances, including pyrogens, from the medium.

Albumins are readily soluble in water and can only be precipitated by high concentrations of neutral salts such as ammonium sulfate. The solution stability of BSA is very good (especially if the solutions are stored as frozen aliquots). Albumins are frequently used as stabilizers for other solubilized proteins (e.g., labile enzymes). However, albumin is readily coagulated by heat. When heated to 50°C or above, albumin quite rapidly forms hydrophobic aggregates which do not revert to monomers upon cooling. At somewhat lower temperatures, aggregation is also expected to occur, but at relatively slower rates.

Albumin is used to solubilize lipids, and is also used as a blocking agent in Western blots or ELISA applications.

Bovine Serum Albumin Lyophilised pH ~7

HUMAN SERUM, PLASMA & ALBUMIN

The **human serum** «off-the-clot» is processed from human blood that has had coagulation induced. It is collected from volunteer donors. Each batch is rigorously controlled and screened for Hepatitis B (HBS), Hepatitis C (HCV) and HIV Type 1 and 2 (HIV1/2).

Our **human sera** are mainly sourced in Europe and Canada.

- *Important : Products of human origin should be considered potentially infectious and handled accordingly.*

Human Serum AB male HIV tested

Cat N° :	S4190-100	Unit/Size :	100 ml		 -20°C	 60 m
----------	------------------	-------------	---------------	---	---	--

Human Serum HIV tested

Cat N° :	S4200-100	Unit/Size :	100 ml		 -20°C	 60 m
----------	------------------	-------------	---------------	---	---	--

Human Plasma pooled

Cat N° :	S4180-100 S4180-500	Unit/Size :	100 ml 500 ml		 -20°C	 48 m
----------	--------------------------------------	-------------	--------------------------------	---	---	--

Human Serum Albumin

Cat N° :	P6140-100GR P6140-500GR P6140-KG	Unit/Size :	100 g 500 g 1 kg		 +8°C +2°C	 48 m

About Cell Culture Media

Standard Media

Biowest media formulations are manufactured following original publications, standards set by the Tissue Culture Association and accepted formulations. These formulations may vary from these standards by substituting hydrated, chlorinated and/or the salt forms of certain compounds where such substitutions contribute to improved performance of the product.

Custom Made Formulations

The preparing and production of your personalised cell culture media compositions is another of our services. Give us the list of components needed and the corresponding quantities and we will produce this to your requirements. There may be a short delay for this service.

Quality Assurance

All of the chemicals, raw materials and equipment that we use are of the highest quality. Inorganic chemicals are analytical, ACS, USP, EP, FCC grade or otherwise the finest grade available. All other components are evaluated by standards established by Biowest

All new batches of chemicals are introduced in the process after stringent QC. The water used for media preparation is of the highest quality. It is of WFI quality, produced in several steps including centrifugal distillation and tested for endotoxins. The resistivity is measured in line and all values are monitored and stored by the QC department. The water is always freshly processed and cooled down to 20°C before adding the powder.

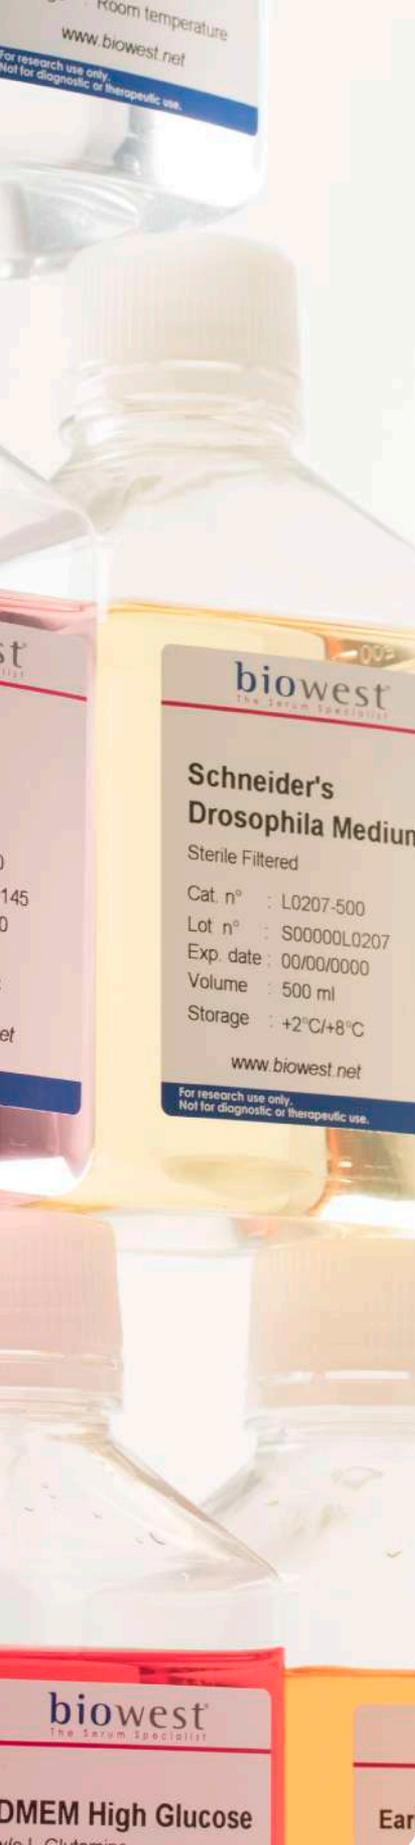

Equipment and conditions

All equipment used for the manufacturing of powdered and liquid media are made of chemical inert materials which will not contaminate the final product. For nearly 30 years, Biowest has supplied the cell culture industry, following strict environmental conditions regarding cleanliness and moisture. Humidity and temperature are monitored constantly to guarantee that all chemicals are ground into fine powder. The liquid media sterilisation is carried out by going through a 0,1 µm pore size sterile filter.

Batch size

Batch sizes for powdered media range from 1 to 10.000 liters, for liquid media from 1 to 1500 liters.

End Product Testing

The powder Media are tested physically for osmotic effects and pH. Osmolality is determined by means of the freezing point method. The chemical composition and the homogeneity of the mixture are controlled by analysis of glucose or sodium in the sample. Endotoxin testing is performed using the Limulus Amoebocyte test. The chromokinetic test is used to verify the quality of the medium.

The liquid Media are tested for the sterility, pH and osmolality. The biological performance test is done on different cell lines, for each type of media. The endotoxin level is also tested by a chromokinetic test.

Storage and Stability

Powdered media must be stored at 2-8°C in their original containers and in dry, dark conditions. Heat, light and humidity can greatly affect the performance of powdered media therefore we recommend that powder be stored correctly if not used entirely. All liquid media must be stored at 2-8°C in the dark.

Advantages and use of powdered tissue culture media

While liquid media are convenient to use, there are several drawbacks which make powdered media also attractive:

1. Long term studies can be carried out using a single batch of powdered medium
2. Storage time higher
3. Reduces the unit costs by 3-10 times
4. Storage space is greatly reduced

The advantages of liquid media

1. Lower labour costs
2. Quality control and functional testing
3. Stock organisation is easier to control

The protocols of all steps during processing and all final test results, reassure the customer that each batch meets the criteria and has been manufactured to the product specifications. The retained samples also allow the testing in long term shelf-life studies, and also control testing in response to customer inquiries.

BASAL MEDIUM EAGLE - BME

Basal Medium Eagle is principally used for diploid or primary cell cultures. It is the simplest of the basal media with all essential components for growth. BME ideally supports cell lines such as HeLa, L-cells and primary mammalian fibroblasts.

BME w/ Earle's Salts w/o L-Glutamine

Cat N° :	L0042-500	Unit/Size :	500 ml		 +8°C -2	 24m
----------	------------------	-------------	---------------	--	---	--

BME w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0030-N1L P0030-N10L	Unit/Size :	For 1L For 10L		 +8°C -2	 48m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

> **Composition available p.55**

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

CMRL 1066

CMRL was originally formulated for promoting « L » Earle cells growth.

CMRL 1066 w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0058-N1L P0058-N10L	Unit/Size :	For 1L For 10L		 +8°C -2	 24m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

> **Composition available p.56**

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

DULBECCO'S MODIFIED EAGLE MEDIUM - DMEM

Dulbecco's Modified Eagle Medium is for supporting and maintaining a broad spectrum of mammalian cell types.

DMEM HIGH GLUCOSE

DMEM High Glucose w/o L-Glutamine
w/o Sodium Pyruvate

Cat N° :	L0101-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/ L-Glutamine
w/o Sodium Pyruvate

Cat N° :	L0102-500	Unit/Size :	500 ml		 +8 +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/ stable Glutamine
w/ Sodium Pyruvate

Cat N° :	L0103-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/ L-Glutamine
w/ Sodium Pyruvate

Cat N° :	L0104-500	Unit/Size :	500 ml		 +8 +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/o L-Glutamine
w/ Sodium Pyruvate

Cat N° :	L0106-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/o L-Glutamine
w/ 25mM Hepes w/o Sodium Pyruvate

Cat N° :	L0100-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/ stable Glutamine
w/ 25mM Hepes w/o Sodium Pyruvate

Cat N° :	L0107-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM High Glucose w/ L-Glutamine
w/o Sodium Bicarbonate w/ Sodium Pyruvate

Cat N° :	P0102-N1L P0102-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 36m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

DMEM High Glucose w/ L-Glutamine
w/o Sodium Bicarbonate w/o Sodium Pyruvate

Cat N° :	P0103-N1L P0103-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 36m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

DMEM - HAM'S F12

Studies to determine the nutritional requirements of many cells have been in progress since Eagle's first reports. The major essential nutrients were identified and work became focused on the media requirements of individual cell types. Many media designed for these purposes are now available.

Among the first of these media, developed initially to study hormonal requirements of cells in culture, was a mixture of DMEM medium and Ham's F12 medium, known as DMEM Ham's F12.

DMEM - F12 w/o L- Glutamine
w/o Hepes

Cat N° : L0090-500	Unit/Size : 500 ml			
---------------------------	---------------------------	---	---	---

DMEM - F12 w/o L-Glutamine
w/o Hepes w/o Glucose

Cat N° : L0091-500	Unit/Size : 500 ml			
---------------------------	---------------------------	---	---	---

DMEM - F12 w/ stable Glutamine
w/ 15 mM Hepes

Cat N° : L0092-500	Unit/Size : 500 ml			
---------------------------	---------------------------	---	---	---

DMEM - F12 w/ L-Glutamine w/ 15 mM Hepes

Cat N° :	L0093-500	Unit/Size :	500 ml		 +8 +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

DMEM - F12 w/o L-Glutamine w/ 15 mM Hepes

Cat N° :	L0094-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM - F12 w/ L-Glutamine w/ 25 mM Hepes

Cat N° :	L0095-500	Unit/Size :	500 ml		 +8 +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

DMEM - F12 w/o L-Glutamine w/ 25 mM Hepes

Cat N° :	L0096-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

DMEM - F12 w/ L-Glutamine w/o Sodium Bicarbonate w/ 15 mM Hepes

Cat N° :	P0095-N1L P0095-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 36m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

GLASGOW MEM BHK 21

GMEM was originally formulated for growing BHK21 cells. It is intended for use with adherent cell lines.

GMEM BHK 21 w/ L-Glutamine w/o Tryptose Phosphate Broth

Cat N° :	L0221-500	Unit/Size :	500 ml		 +8 +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

GMEM BHK 21 w/o L-Glutamine w/o Tryptose Phosphate Broth

Cat N° :	L0222-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

GMEM BHK 21 w/ L-Glutamine w/o Sodium Bicarbonate w/o Tryptose Phosphate Broth

Cat N° :	P0120-N1L P0120-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 36m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

> Composition available p.61

- Glasgow MEM media are only available with a minimum order quantity of 20 bottles x 500 ml.
- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

HAM'S F10 / F-10 NUTRIENT MEDIUM

To support the growth of Chinese Hamster Ovary Cells under serum free conditions and other mammalian cell types with serum supplementation. It is a popular medium for growth of fastidious cell lines.

Ham's F10 w/ L-Glutamine

Cat N° :	L0140-500	Unit/Size :	500 ml		 +8 -2°C	 12m
----------	-----------	-------------	--------	---	--	---

Ham's F10 w/o L-Glutamine

Cat N° :	L0145-500	Unit/Size :	500 ml		 +8 -2°C	 24m
----------	-----------	-------------	--------	---	--	---

Ham's F10 w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0146-N1L P0146-N10L	Unit/Size :	For 1L For 10L		 +8 -2°C	 36m
----------	-------------------------	-------------	-------------------	---	--	---

> Composition available p.62

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

HAM'S F12 / F-12 NUTRIENT MEDIUM

Ham's F12 was originally developed for the serum-free clonal growth of Chinese Hamster Ovary (CHO) cells, lung cells and mouse L-cells. It is frequently used with dialysed serum, hormones, selenium and other supplements for serum-free cultures. It is the medium of choice for supporting the growth of cells of rodent origin, particularly rabbit and rat and has proved to be an excellent cloning medium for the culture of myeloma and hybrid cells.

Ham's F12 w/ L-Glutamine

Cat N° :	L0135-500	Unit/Size :	500 ml		 +8 -2°C	 12m
----------	-----------	-------------	--------	---	--	---

Ham's F12 w/o L-Glutamine

Cat N° :	L0136-500	Unit/Size :	500 ml		 +8 -2°C	 24m
----------	-----------	-------------	--------	---	--	---

Ham's F12 w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0134-N10L P0134-N1L	Unit/Size :	For 10 L For 1 L		 +8 -2°C	 36m
----------	-------------------------	-------------	---------------------	---	--	---

> Composition available p.63

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

HAM'S F14 / F-14 NUTRIENT MEDIUM

Ham's F14 medium was developed from the Ham's F12, which was originally developed for the serum-free clonal growth of Chinese Hamster Ovary (CHO) cells, lung cells and mouse L-cells.

Ham's F14 contains a double concentration of amino acids compared to the Ham's F12. This product is also supplemented with Calcium chloride and Ascorbic Acid.

Ham's F14 w/ 6g/L glucose w/ 1mg/L ATP

Cat N° : L0138-500	Unit/Size : 500 ml			
--------------------	--------------------	---	---	---

> Composition available p.64

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

ISCOVE'S MODIFIED DULBECCO'S MEDIUM - IMDM

In 1976, Guilbert and Iscove demonstrated that precursor cells of erythrocytes and macrophages could be cultured in a reduced-serum medium supplemented with albumin, transferrin, lecithin, and selenium.

Iscove's medium is a modification of Dulbecco's Modified Eagle's Medium (DMEM) containing selenium, additional amino acids and vitamins, sodium pyruvate, HEPES buffer, and potassium nitrate instead of ferric nitrate.

Further studies demonstrated that Iscove's Medium would support murine B lymphocytes, hemopoietic tissue from bone marrow, B cells stimulated with lipopolysaccharide, T lymphocytes, and a variety of hybrid cells.

IMDM w/ L- Glutamine w/ 25mM Hepes

Cat N° : L0190-500	Unit/Size : 500 ml			
--------------------	--------------------	---	---	---

IMDM w/stable Glutamine w/ 25mM Hepes

Cat N° : L0191-500	Unit/Size : 500 ml			
--------------------	--------------------	---	---	---

IMDM w/o L-Glutamine w/o Hepes

Cat N° : L0192-500	Unit/Size : 500 ml			
--------------------	--------------------	---	---	---

IMDM w/ L-Glutamine w/o Sodium Bicarbonate w/ 25 mM Hepes

Cat N° : P0191-N1L P0191-N10L	Unit/Size : For 1L For 10L			
----------------------------------	-------------------------------	---	---	---

> Composition available p.65

- Other packagings available on request.

LEIBOVITZ L-15 MEDIUM

The Leibovitz L-15 media were formulated to promote the cell growth in medium not balanced in CO₂. The formulations were developed with the sodium bicarbonate buffer. The Leibovitz L-15 media are buffered by a complement of salts, free base amino acids and galactose, so they can be used under conditions of free gaseous exchange with the atmosphere. When properly supplemented, L-15 Medium supports established cell lines, such as HEP-2 and LLC-MK2, as well as primary explants of embryonic and adult human tissue. Many viruses also have been successfully cultivated in this medium.

Leibovitz L15 Medium w/o L-Glutamine

Cat N° :	L0300-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

Leibovitz L15 Medium w/ L-Glutamine

Cat N° :	P0350-N1L P0350-N10L	Unit/Size :	For 1L For 10L			
----------	---------------------------------	-------------	---------------------------	---	---	---

> **Composition available p.66**

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

MC COY'S 5A MEDIUM

Mc Coy's media were originally formulated for growth and support of lymphocytes. This final modification produced a medium identical to RPMI 1629. McCoy's 5A media support the indefinite proliferation of Walker 256 carcinoma cells. In addition, it is excellent for the propagation of leukocytes, biopsy tissues, a broad range of human and rat normal or transformed cell types, the most current primary and continuous cell lines.

McCoy's 5A w/ L-Glutamine

Cat N° :	L0210-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

McCoy's 5A w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0390-N1L P0390-N10L	Unit/Size :	For 1L For 10L			
----------	---------------------------------	-------------	---------------------------	---	---	---

> **Composition available p.67**

- For your special formulation, please contact us so we can make your custom made Media on request.

MEDIUM 199

The longterm cultivation of cells requires additional serum. When properly supplemented, Medium 199 has broad species applicability, particularly for the cultivation of non-transformed cells. It is widely used in virology, vaccine production and in vitro cultivation of primary explants of mouse pancreatic epithelial and rat lens tissues.

Medium 199 w/ Hanks' Salts w/ L-Glutamine

Cat N° :	L0330-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

Medium 199 w/ Earle's Mod. Salts w/ L-Glutamine w/ 1.25g/l Sodium Bicarbonate

Cat N° :	L0355-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

Medium 199 w/ Earle's Salts w/o L-Glutamine

Cat N° :	L0356-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

Medium 199 w/ Earle's Salts w/ stable Glutamine w/ 25 mM Hepes

Cat N° :	L0361-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

Medium 199 modified w/ Hanks' Salts w/o L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0410-N1L P0410-N10L	Unit/Size :	For 1L For 10L			
----------	---------------------------------------	-------------	---------------------------------	--	--	--

Medium 199 w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0420-N1L P0420-N10L	Unit/Size :	For 1L For 10L			
----------	---------------------------------------	-------------	---------------------------------	---	---	---

Medium 199 w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate w/ 25 mM Hepes

MINIMUM ESSENTIAL MEDIUM - MEM

Minimum Essential Medium (MEM) with Earle's Balanced Salts is a modification of Eagle's earlier medium Basal Medium Eagle (BME), containing higher concentrations of the essential nutrients. These media have demonstrated the ability to support a variety of normal and transformed cells in culture and contain Earle's Balanced Salts, which make them suitable for use in atmospheres charged with CO₂ gas.

MEM W/ EARLE'S SALTS

MEM w/ Earle's Salts w/ L-Glutamine

Cat N° :	L0415-500	Unit/Size :	500 ml			
----------	------------------	-------------	---------------	---	---	---

MEM w/ Earle's Salts w/ stable Glutamine

Cat N° :	L0416-500	Unit/Size :	500 ml

RPMI 1640 MEDIUM

RPMI are general purpose enriched media with extensive applications for a broad spectrum of mammalian and hybridoma cells, including human myeloma, mouse hybridoma, human leukocytes, and B and T lymphocytes. It was originally formulated for suspension cultures and monolayer culture of human leukemia cells.

RPMI 1640 w/ L-Glutamine

Cat N° :	L0500-100 L0500-500	Unit/Size :	100 ml 500 ml		 +8 +2°C	 12m
----------	--------------------------------------	-------------	--------------------------------	---	--	---

RPMI 1640 w/o L-Glutamine

Cat N° :	L0501-100 L0501-500	Unit/Size :	100 ml 500 ml		 +8 +2°C	 24m
----------	--------------------------------------	-------------	--------------------------------	---	--	---

RPMI 1640 w/ stable Glutamine

Cat N° :	L0498-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

RPMI 1640 w/ L-Glutamine w/ 25 mM Hepes

Cat N° :	L0495-500	Unit/Size :	500 ml		 +8 +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

RPMI 1640 w/ stable Glutamine w/ 25 mM Hepes

Cat N° :	L0496-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

RPMI 1640 w/o L-Glutamine w/ 25 mM Hepes

Cat N° :	L0490-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	--	---	--

RPMI 1640 Dutch Modification w/o L-Glutamine w/ 1g/l Sodium Bicarbonate w/20mM Hepes

Cat N° :	L0492-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

RPMI 1640 w/o L-Glutamine w/o Folic Acid

Cat N° :	L0503-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

RPMI 1640 w/o L-Glutamine w/o Phenol Red

Cat N° :	L0505-500	Unit/Size :	500 ml		 +8 +2°C	 24m
----------	------------------	-------------	---------------	---	--	---

RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0860-N1L P0860-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 24m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

RPMI 1640 w/o L-Glutamine w/o Sodium Bicarbonate

Cat N° :	P0870-N1L P0870-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 24m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/o Phenol Red

Cat N° :	P0880-N1L P0880-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 24m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

RPMI 1640 w/o L-Glutamine w/o Sodium Bicarbonate w/o Phenol Red

Cat N° :	P0871-N1L P0871-N10L	Unit/Size :	For 1L For 10L		 +8 +2°C	 24m
----------	---------------------------------------	-------------	---------------------------------	---	--	---

RPMI 1640 w/ L- Glutamine w/o Sodium Bicarbonate w/ 25 mM Hepes w/o Phenol Red

Cat N° :	P0876-N1L P0876-N10L	Unit/Size :	For 1L For 10L		 +8°C +2°C	 24m

SCHNEIDER'S DROSOPHILA MEDIUM

Schneider's Insect medium was developed to support the growth of excised imaginal disks from the fruitfly, *Drosophila melanogaster*. When supplemented with 5-20% heat-inactivated fetal bovine serum, Schneider's medium has been found to support the rapid growth of both primary and established cultures of cells derived from *Drosophila* spp. and several other dipterans.

Schneider's Drosophila Medium

Cat N° :	L0207-500	Unit/Size :	500 ml		 +8°C +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

> **Composition available p.75**

- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

SERUM REDUCED MEDIA - MCDB

These media were formulated as a reduced serum supplemented medium for the cultivation of human microvascular endothelial cells. For other microvascular cells, it is recommended to be used with growth factors, like EGF or hormones like hydrocortisone.

MCDB 151

Cat N° :	L1203-500	Unit/Size :	500 ml		 +8°C +2°C	 12m
----------	------------------	-------------	---------------	---	--	---

> **Composition available p.76**

- MCDB media are only available with a minimum order quantity of 20 bottles x 500 ml.
- Other packagings available on request.
- For your special formulation, please contact us so we can make your custom made Media on request.

Instructions

How to store your product

Store the dry powdered medium at 2-8°C under dry conditions and liquid medium at 2-8°C in the dark.

Deterioration of the powdered medium may be recognized by any or all of the following:

- color range
- granulation / clumping
- insolubility

Deterioration of the following into liquid media:

- pH change
- precipitate or particulate matter throughout the solution
- cloudy appearance
- color change

The nature of additional supplements may affect storage conditions and shelf life of the medium. Product label bears expiration date.

How to prepare your solution from powder media

Powdered Media are extremely hygroscopic and should be protected from atmospheric moisture. The entire content of each package should be closed immediately after opening. Preparing a concentrated solution of medium is not recommended as precipitates may form.

Supplements can be added prior to filtration or introduced aseptically to sterile medium. The nature of the supplements may effect storage conditions and shelf life of the medium.

1. Measure out 90% of initial required volume of water. Water temperature should be 15 – 20 °C.
2. While gently stirring the water, add the powdered medium. Stir until dissolved. Do not heat.
3. Rinse original package with small amount of water to remove all traces of powder. Add to solution in step 2.
4. Supplement the medium according to your needs. For sodium bicarbonate and L-glutamine see pages 52-54
5. While stirring, adjust the pH of the medium to 0,1 – 0,3 pH units below the desired pH since it may rise during filtration. The use of 1N HCl or 1N NaOH is recommended.
6. Add additional water to bring the solution to final volume.
7. Sterilize immediately by filtration using a membrane with a porosity of 0,22 microns or less.
8. Aseptically dispense medium into sterile container.

Hanks' Balanced Salt Solutions - HBSS	41
Hepes	42
Other Salt Solutions & Salts	42

About Salt Solutions & Salts / Buffers

The irrigating buffers and salt solutions are sterile physiological balanced solutions intended for use in the maintenance of mammalian cells where a chemically defined, balanced salt solution provides an environment that will maintain the structural and physiological integrity of cells in vitro. The buffers and solutions are used in the first steps of preparing parts of organs and during the dissociation process or for isolation of cell suspensions. Further applications are the intermediate steps for the cultivation of cells like washing, centrifugation, suspending and counting and also many analytical methods or biochemical treatments. For the most part, these solutions should be used to maintain the cells only for minutes or, at the most, a few hours in suspension. These buffers and solutions are not cell culture media.

They are made up of a Phosphate buffer system, sodium chloride to adjust the osmolarity and in some cases sugar for a short time nutrition and stabilisation of morphology. For applications where Ca^{2+} and Mg^{2+} ions interfere with enzyme activity e.g. Trypsin, use the modified buffers w/o Calcium w/o Magnesium.

DULBECCO'S PHOSPHATE BUFFERED SALINE - DPBS

Antibiotics

The use of antibiotics is a helpful tool in the cell culture field or where fluids have to be conserved and prevented from bacterial contamination.

Most of the antibiotics suppress the growth of micro-organisms by blocking an anabolic pathway.

NANOMYCOPULITINE actively kills the bacteria, including mycoplasma, in all three stages of development without interfering with the eukaryotic metabolism.

TRYPSIN

Trypsin is a porcine pancreas-derived enzyme that is commonly used for the dissociation and disaggregation of adherent growing mammalian cells and tissues. The concentration of trypsin necessary to dislodge the cells from their substrate depends on the sensitivity of the cells.

Trypsin 0.25 % in PBS w/o Calcium w/o Magnesium w/ Phenol Red

ACCUTASE

Accutase is a ready to use cell detachment solution developed to meet most demanding requirements for a gentle and effective detachment of adherent cells. It can be used as direct replacement for Trypsin, but has several advantages due to the more gentle detachment of the cells.

Features:

- Gentle & effective cell detachment
- Protection of surface epitopes for e.g. subsequent flow cytometry analysis
- Maximum protection for sensitive cell culture: primary, neuronal or stem cells
- No neutralization required
- No aliquotation needed, stable in the refrigerator for two months after thawing

Accutase combines proteolytic and collagenolytic enzyme activity. As it is non-mammalian and non-bacterial origin, it is an excellent choice for serum free cell cultures. Accutase can be used for the whole range of adherent cells.

GLUTAMINE

L-Glutamine is an essential amino acid required by virtually all mammalian and insect cells grown in culture. It is a crucial component of many cell culture media and serves as a major energy source for cells in culture. L-Glutamine is very stable as a dry powder and as a frozen solution.

However, in liquid media or stock solutions, L-Glutamine can degrade relatively rapidly. L-Glutamine is also more labile in cell culture solution than other amino acids.

Dipeptide derivatives of L-Glutamine (Stable Glutamine) prevent the intramolecular cyclization reaction associated with solutions of L-Glutamine. These derivatives are therefore stable in solution and allow the formulation of cell culture media containing L-Glutamine that may be stored at 4°C for extended periods. Solutions containing these derivatives can be even autoclaved without appreciable degradation of the product (30 minutes at 121°C results in <5% loss of the product).

The dipeptide derivatives are metabolized within the cells to yield L-Glutamine plus the second amino acid. This results in more consistent delivery of L-Glutamine to your cells and avoids toxic build-up of ammonia in your cell cultures. This feature can be especially important for ammonia-sensitive cell lines.

L-Glutamine 100X, 200mM

Cat N° :	X0550-100	Unit/Size :	100 ml		 -20°C	 24 m
----------	------------------	-------------	---------------	---	---	--

Glutamine stable 100X, 200mM

Cat N° :	X0551-100	Unit/Size :	100 ml		 -20°C	 24 m
----------	------------------	-------------	---------------	---	---	--

L-Glutamine

Cat N° :	P1012-100GR P1012-KG	Unit/Size :	100 g 1000 g		 Room Temp	 24 m
----------	---------------------------------------	-------------	-------------------------------	---	---	--

L-Alanyl-L-Glutamine, stable Glutamine

Cat N° :	P1031-100GR	Unit/Size :	100 g		 Room Temp	 36 m
----------	--------------------	-------------	--------------	---	---	--

- Other packagings available on request

COLCEMID

Colcemid halts the division of cells in mitosis. It prevents the formation of the spindle apparatus responsible for cell division, thereby permitting an accumulation of metaphases.

Colcemid 10 µg/ml in PBS (Demecolcin)

Cat N° :	L0040-010 L0040-020 L0040-050	Unit/Size :	10 ml 20 ml 50 ml			
----------	--	-------------	--	---	---	---

- Other packagings available on request
- For your special formulation, please contact us so we can make your custom made product on request

PHYTOHAEMAGGLUTININ M - PHA-M

Phytohaemagglutinin is a lectin, extracted from red kidney beans, used for the stimulation of cell proliferation in lymphocyte culture. PHA-M also has a powerful erythroagglutinating property and it was originally used for separating leukocytes from whole blood.

Phytohaemagglutinin M - PHA-M

Cat N° :	L3010-005	Unit/Size :	5 ml			
----------	------------------	-------------	-------------	---	---	---

- Other packagings available on request

LYMPHOSEP

Lymphosep is designed for the simple, rapid isolation of lymphocytes from whole blood that has been diluted and treated with anti-coagulant or defibrinating agent.

Lymphosep, Lymphocyte Separation Media

Cat N° :	L0560-100 L0560-500	Unit/Size :	100 ml 500 ml			
----------	--------------------------------------	-------------	--------------------------------	---	---	---

CELL CULTURE WATER

Cell Culture Water Pyrogen free

Cat N° :	L0970-100	Unit/Size :	100 ml
	L0970-500		500 ml
	L0970-1000		1000 ml

BIOGUARD

Bioguard is used in the disinfection of surfaces of laboratory apparatus and of CO2 incubator. Bioguard prevents contamination with and growth of fungi, bacteria, and their spores, mycoplasma and viruses including HIV and Hepatitis B. Bioguard is non-toxic and biodegradable.

we recommend :

- Bioguard-S to keep safe all common work surfaces.
- Bioguard-A to disinfect the water trays of common incubator types and the water required for humidity, potential source of contamination which can disperse in the incubator.

Bioguard - S

Cat N° :	D1010-1000	Unit/Size :	1000 ml
----------	------------	-------------	---------

Bioguard - A

Cat N° :	D1020-100	Unit/Size :	100 ml

Standard Terms of Sale

The standard terms of sale and delivery shall be deemed to have been accepted for any order placed with our company. In the event of dispute, our terms cancel any conflicting clauses and terms printed on the orders or correspondence from buyers. Amendments of the initial agreement or any secondary agreement shall be valid only if they have been entered into in writing.

1- Products

The specifications and figures mentioned in our catalogues are given for information and without commitment. Biowest reserves the right to change its products without notice, depending on improvements imposed by the technical development.

2- Orders

Orders may be sent by letter, fax or e-mail. Orders shall be final only when Biowest has confirmed them in writing. They must include :

- the numbers of our catalogues or our offers. If the description is vague, if we ourselves have to make a choice, we disclaim liability on this account. The buyer shall bear any costs of return for the resulting non-compliance.
- delivery and invoicing addresses
- Inter-community VAT number

3- Deliveries

3.1- Delivery time

Delivery time shall be confirmed upon receipt of your order. If the products are not in stock, a delivery time shall be proposed for information, subject to accidental cases and force majeure. No penalty for late performance or damage may be claimed in the event said deliver times are not respected. Biowest shall choose the method of dispatch that it considers to be the most suitable for its customer, if the latter has not expressed special requirements.

3.2- Accidental cases and force majeure

Biowest shall be released from its obligation to deliver in the event of any accidental case or force majeure event that impedes either the manufacturing, dispatch or import into France. A force majeure event means any event beyond our control, which results in delaying or preventing the performance that could not be reasonably controlled or avoided.

4- Price and invoicing

The prices on catalogues, printed leaflets, price lists or on-line are given for information. Biowest reserves the right to amend same, without notice. Our prices are guaranteed for the term of validity of the offer or the estimate, apart from the change in the price of raw materials, exchange rates of foreign currencies or customs duties. The prices invoiced shall always be those in force on the date of the actual delivery.

Unless otherwise specified in writing, our prices are quoted net and excluding tax. Transport costs are defined in relation to volumes and end destinations.

5- Payment

5.1- Terms and conditions

Our invoices are payable by cheque, bank or postal transfer, revocable letter of credit, within 30 days, date of invoicing net and without discount, unless otherwise agreed in writing. Biowest reserves the right to claim an advance payment or a part payment prior to the fulfilment of the order.

5.2- Penalty clause and event of default clause

By express agreement and except with Biowest's prior agreement, the non payment of an invoice at due date shall give rise, by operation of law, regardless of the method of payment :

- to a minimum interest of 3 times the legal interest rate set by decree on 1 January of each year,
- The immediate payability of all outstanding amounts.

Standard Terms of Sale

Costs, outlay and expenses incurred by Biowest to obtain the payment of goods shall be borne by the customer under Article 700 of the New French Code of Civil Procedure (French acronym N.C.P.C.): fixed allowance for recovery costs : EUR 40. Moreover, pending regularisation, Biowest reserves the right to suspend any subsequent deliveries.

6- Warranty of services and reservations

6.1- Claims

The customer must check upon receipt of the products that the delivery is indeed compliant with its order. Any claim relating to transport should be made to our services within 48 hours and mentioned on the carrier's receipt. For any other non-apparent defect, we should be notified thereof within a maximum period of 3 months after receipt of the products and product storage instructions should be respected pending our instructions.

6.2 – Claim for partially thawed Serum

We do not accept claims if Animal Serum is delivered partially thawed, and we will not replace it free of charge, as our tests show a very good stability of the product even in these conditions.

6.3- Return

No return shall be accepted without the prior and written agreement of our sales department, which shall specify the terms and conditions of return. The returned products shall be credited, less a fixed amount for the costs of control and return to stock of 15% of the sale price, with a minimum of EUR 35 and only if they are in their original condition.

6.4- Scope of the warranty

The user must decide that said product is suitable for its specific application. The products of our catalogue are devised for scientific purposes only (use in-vitro exclusively). They may not be used as drugs, annex therapeutical products, pharmaceutical or cosmetic preparations, farm product and human or veterinary use products. The buyer shall be solely responsible for their use.

6.5- Transfer of risks

Our goods and their packaging shall always travel at the buyer's risks, even if they are dispatched carriage paid. We disclaim any liability for alterations occurring during transport. In the event of any damage, the consignee shall be responsible for notifying the carrier who made delivery of the losses and damage observed upon arrival, by registered letter within three days following receipt of the goods, in compliance with the regulations of Article 105 of the French Commercial Code and in general for bringing any claim against the carrier.

7- Retention of title clause

The seller reserves title to the goods until the price thereof in principal and interest has been paid in full. Failing payment of the price at the agreed due date, the seller may take back the goods. The sale shall be cancelled by operation of law if the seller sees fit and it shall be entitled to part payments already paid in consideration of any use of the goods by the buyer.

8- Disputes

Courts in the jurisdiction of the place of the company's registered office shall have sole jurisdiction in the event of a dispute of any kind or a dispute relating to the formation or fulfilment of the order. French law only shall govern orders placed with Biowest.

P0350-N1L	For 1 L Leibovitz L 15 Medium w/ L-Glutamine	30
P0390-N10L	For 10 L McCoy's 5A w/ L-Glutamine w/o Sodium Bicarbonate	30
P0390-N1L	For 1 L McCoy's 5A w/ L-Glutamine w/o Sodium Bicarbonate	30
P0410-N10L	For 10 L Medium 199 modified w/ Hanks' Salts w/o L-Glutamine w/o Sodium Bicarbonate	31
P0410-N1L	For 1 L Medium 199 modified w/ Hanks' Salts w/o L-Glutamine w/o Sodium Bicarbonate	31
P0420-N10L	For 10 L Medium 199 w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate	31
P0420-N1L	For 1 L Medium 199 w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate	31
P0425-N10L	For 10 L Medium 199 w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate w/ 25 mM HEPES	31
P0425-N1L	For 1 L Medium 199 w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate w/ 25 mM HEPES	31
P0440-N10L	For 10 L MEM Alpha Modification w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate	33
P0440-N1L	For 1 L MEM Alpha Modification w/ Earle's Salts w/ L-Glutamine w/o Sodium Bicarbonate	33
P0450-N10L	For 10 L MEM w/ Earle's Salts w/ L-Glutamine w/ NEAA w/o Sodium Bicarbonate	32
P0450-N1L	For 1 L MEM w/ Earle's Salts w/ L-Glutamine w/ NEAA w/o Sodium Bicarbonate	32
P0451-N10L	For 10 L MEM w/ Earle's Salts w/ L-Glutamine w/o NEAA w/o Sodium Bicarbonate	32
P0451-N1L	For 1 L MEM w/ Earle's Salts w/ L-Glutamine w/o NEAA w/o Sodium Bicarbonate	32
P0515-N10L	For 10 L MEM w/ Hanks' Salts w/ L-Glutamine w/ NEAA w/o Sodium Bicarbonate	33
P0515-N1L	For 1 L MEM w/ Hanks' Salts w/ L-Glutamine w/ NEAA w/o Sodium Bicarbonate	33
P0750-N10L	For 10 L Dulbecco's Phosphate Buffered Saline w/o Calcium w/o Magnesium	39
P0750-N1L	For 1 L Dulbecco's Phosphate Buffered Saline w/o Calcium w/o Magnesium	39
P0860-N10L	For 10 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate	34
P0860-N1L	For 1 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate	34
P0870-N10L	For 10 L RPMI 1640 w/o L-Glutamine w/o Sodium Bicarbonate	34
P0870-N1L	For 1 L RPMI 1640 w/o L-Glutamine w/o Sodium Bicarbonate	34
P0871-N10L	For 10 L RPMI 1640 w/o L-Glutamine w/o Sodium Bicarbonate w/o Phenol Red	34
P0871-N1L	For 1 L RPMI 1640 w/o L-Glutamine w/o Sodium Bicarbonate w/o Phenol Red	34
P0876-N10L	For 10 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/ 25 mM HEPES w/o Phenol Red	35
P0876-N1L	For 1 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/ 25 mM HEPES w/o Phenol Red	35
P0880-N10L	For 10 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/o Phenol Red	34
P0880-N1L	For 1 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/o Phenol Red	34
P0883-N10L	For 10 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/o Glucose	35
P0883-N1L	For 1 L RPMI 1640 w/ L-Glutamine w/o Sodium Bicarbonate w/o Glucose	35
P0940-100GR	100 g Trypsin - EDTA 1X Lyophilised w/ Sodium Chloride	47
P1012-100GR	100 g L-Glutamine	49
P1012-KG	1 kg L-Glutamine	49
P1031-100GR	100 g L-Alanyl-L-Glutamine, stable Glutamine	49
P2035-500GR	500 g Potassium Chloride	42
P2060-500GR	500 g Sodium Bicarbonate, cell culture tested	42
P2064-N5L	For 5 l Sodium Chloride (for dilution 9 g/l)	42
P2066-KG	1 kg Sodium Chloride	42
P4020-1GR	1 g Gentamicin Sulfate	44
P4020-5GR	5 g Gentamicin Sulfate	44
P4030-250MG	250 mg Amphotericin B	44

Contact.

HUBERLAB.

committed to science

OneStop. OneShop – HUBERLAB. bietet das Rundum-Sorglos-Paket für alle Bedürfnisse im Labor.

Profitieren Sie von unseren langjährigen Partnerschaften zu Top-Lieferanten.

Als Vollversorger für das Labor lässt unser umfassendes Sortiment keine Wünsche offen.

OneStop. OneShop – HUBERLAB. Nous offre le package sans souci pour tous les besoins de votre laboratoire.

Profitez de nos partenariats de longue date avec les meilleurs fournisseurs.

En tant que fournisseur complet pour le laboratoire, notre gamme complète ne laisse rien à désirer.

OneStop. OneShop – HUBERLAB. offers the all-included service package for all of your laboratory requirements.

Benefit from our long-standing partnerships with top-suppliers.

As a full-range supplier for the laboratory, our comprehensive range leaves nothing to be desired.

Wir beraten Sie gerne persönlich
Nous vous conseillons personnellement
We'll be happy to advise you personally
